**5. DOCUMENT CHANGE LOG..... 247**

**7. APPENDIX ..... 252**

7.1 TERMS & DEFINITION .....252

## 1. PURPOSE

The objective of this document is to outline the Business Requirements gathered for all phases of **Project Luna** to meet Alkermes' growing business needs. The document seeks to provide an overall Business and System overview and outline the scope, assumptions, limitations, dependencies, data required to complete this project. This document also includes all Reference documents associated with the functional specifications.

## 2. OVERVIEW

### 2.1 IN SCOPE

Requirement Gathering of following CDE 3.0 Components is in Scope:

- Ingestion and integration of the external data files like IQVIA, ICS etc.
- Ingestion and Integration of data (including Business Rules) from Javelin
- Ingestion and Integration the data from MDM (Customer Master)
- Replication of data from Cloud based systems (like Veeva CRM, Veeva Vault, Marketo, Patient Hub etc.) and internal databases (like Payer Master etc.)
- Quality Checks for DQM Engine
- Ingestion and Integration of the customer master inbound data files from CDE 3.0
- Outbound integration & extract generation for CDE 3.0
- Ingestion and Integration of the data from MDM (Customer Master)
- Extract generation for external vendors (including Javelin), internal systems like Payer Master, MDM etc.
- Creation of Semantic Layer
- Data Generation for the existing reports

### 2.2 OUT OF SCOPE

- Requirements on existing Tableau/Excel based reports.
- Configuration/development changes within Veeva CRM ORG & Veeva CRM Replicated Data HUB
- Configuration/development changes within CDE 2.0

## 2.3 ASSUMPTIONS AND DEPENDENCIES

### KEY ASSUMPTIONS

S.NO.	KEY ASSUMPTIONS
1	Axtria will have access to all the required environments like existing CDE etc. to perform data analysis and discovery on an existing CDE system
2	Availability of IT and Business for Requirements Gathering workshops and System Clarifications
3	Business and IT will review the required sections and provide Sign-off within 3 Business Days

### DEPENDENCIES

S.NO.	DEPENDENCIES
1	Availability of CDE IT team
2	Availability of the Business team
3	Access to an existing CDE environment

## 2.4 DEPENDENCY TRACKER

Below link contains the dependency tracker which includes Feeds details along with mapping across layers.

[CDE3.0 Dependency Tracker](#)

## 2.5 DQ LIST

Based on Feed ID and Object ID, below list contains all the applicable DQ's

[CDS DQ Checks Master List](#)

### 3. GENERAL CLEANSE LAYER RULES

Business Requirement ID	Requirement Description																					
BRD-CR-1	<p>Clean the Zip Code fields based on following rules:</p> <ol style="list-style-type: none"><li>If Zip code contains hyphen (-):<ol style="list-style-type: none"><li>Check the zip length from left till hyphen.</li><li>If length of zip = 4, prefix with a 0 and fetch remaining 4 characters from left till hyphen.</li><li>If length of zip = 5, then fetch first 5 characters from left till hyphen.</li></ol></li><li>If zip code doesn't contain hyphen (-):<ol style="list-style-type: none"><li>If length of zip = 4, prefix with a 0 and fetch remaining 4 characters from left.</li><li>If length of zip &gt;= 5, then fetch first 5 characters from left</li></ol></li></ol>																					
BRD-CR-2	<p><b><u>Removal of Specific Character</u></b></p> <p>Removal of specific characters from the field values on the below conditions:</p> <ol style="list-style-type: none"><li>If Hyphen (-) is received in <b>NDC Number</b> column, then it is removed.</li><li>If below mentioned special characters are received in any record, then they are removed:<ol style="list-style-type: none"><li>Open bracket '('</li><li>Dollar '\$'</li><li>Comma ','</li><li>Closing bracket ')'</li></ol></li><li>If string value '<b>Empty</b>' is received in any record, then it is removed.</li></ol>																					
BRD-CR-3	<p><b><u>Prefixing with Specific Character based on Specific Length</u></b></p> <p>Prefixes are added to the below mentioned attributes on the following conditions:</p> <ol style="list-style-type: none"><li>If the field is received as blank, then no cleansing rule is applied.</li><li>If the length of field received is less than the length mentioned in the below table, then prefix character is added till the expected length of the string is reached.</li></ol> <table><tr><th>Attribute Name</th><th>Length</th><th>Prefix Character</th></tr><tr><td>IQVIA Prescriber Number</td><td>7</td><td>0</td></tr><tr><td>IQVIA Outlet Number</td><td>8</td><td>0</td></tr><tr><td>IQVIA Plan ID/Code</td><td>10</td><td>0</td></tr><tr><td>IQVIA Sales Category</td><td>2</td><td>0</td></tr><tr><td>IQVIA Product Code</td><td>9</td><td>0</td></tr><tr><td>ME Number</td><td>10</td><td>0</td></tr></table>	Attribute Name	Length	Prefix Character	IQVIA Prescriber Number	7	0	IQVIA Outlet Number	8	0	IQVIA Plan ID/Code	10	0	IQVIA Sales Category	2	0	IQVIA Product Code	9	0	ME Number	10	0

#### 4.1.6 CUSTOMER DECILE

BRD-REQ-OBJ-1	<ul style="list-style-type: none"> <li>SEM_CUSTOMER_MASTER</li> <li>XREF_TIME_BASED_CUSTOMER_ATTRIBUTE</li> <li>SEM_CUSTOMER_DECILE</li> <li>VW_SEM_CUSTOMER_DECILE</li> </ul>
---------------	--

**Decile**

- Decile will be calculated for each Customer by Decile scope, data type and Period
  - Decile Scope will be Product, Brand, Product Group and Market
  - Decile will be calculated every time from scratch going back to historical data periods (time travel functionality). For month it would be 24 and for week it would be 52.
  - Data Type, Frozen/Current Flag, Projected/Current Flag will be used to pull correct sales dataset. Sales units will be used to pull correct units from the dataset.
- Below is the sample structure of the table in which Deciles data would be maintained. It will contain data related to Aristada, Vivitrol and Lybalvi Brands and source data with Projected feeds.

Customer Type	ALK ID	Decile Scope	Value Scope	Sales units	Data Type	Frozen/Current	Projected/Enhanced	Period Type	Period	Period Start Date	Period End Date	Decile
HCP	ALK001499849	Brand	Aristada	TRx	XPO	Frozen	Projected	Month	R3	1/1/2020	3/31/2020	10
HCP	ALK001499850	Brand	Aristada	TRx	XPO	Current	Projected	Week	R6	10/1/2019	3/31/2020	5
HCO	ALK001499851	Market	ALAI	TRx	DMND	Frozen	Projected	Month	R12	4/1/2019	3/31/2020	1

- Following is the XREF table template using which the Decile process will run:

Decile Scope	Value Scope	Period Type	Period Value	Period Time Travel	Sales units	Customer Type	Data Type	Frozen/Current	Projected/Enhanced
Brand	Aristada	Month	3	24	TRx	HCP	XPB	Frozen	Projected
Brand	Vivitrol	Week	6	52	Units	HCO	DMND		
Group	ALAI	Week	12	52	TRx	HCP	XPB	Current	Projected
Market	Psychiatry	Month	3	24	TRx	HCP	XPB	Frozen	Projected

- Following are the exclusions that are to be applied where Customer Type is HCP
  - IQVIA Prescriber IDs does start with '95', '96', '97', '98', '99'. Not actually Prescribers

	<div><div><div>Customers with most sales and cumulatively making 10% of the total sales</div><div><div>Decile</div><div><div>10</div><div>9</div><div>8</div><div>7</div><div>6</div><div>5</div><div>4</div><div>3</div><div>2</div><div>1</div></div></div><div>Customers with least sales and cumulatively making 10% of the total sales</div></div><div><div>Step1: Customers are ranked based on their Sales</div><div>Step2: Group the Customers within each Decile such that each makes cumulative total sales of 10%</div></div><div><ul style="list-style-type: none"><li>VW_SEM_CUSTOMER_DECILE holds as is data in semantic Customer Decile and is created to cater Data exchange between Alkermes and ZAIDYN (Snowshare)</li></ul></div></div>
--	--

4.1.7 PRESCRIBER STATUS

BRD-REQ-OBJ-1	<ul style="list-style-type: none"><li>SEM_XPO_PROJECTED</li><li>SEM_XPO_PROJECTED_FROZEN</li><li>XREF_TIME_BASED_CUSTOMER_ATTRIBUTE</li><li>SEM_PRESCRIBER_STATUS</li></ul>
---------------	---

BRD-  
REQ-  
SEM-  
2

### Prescriber Status

- Prescriber Status** will be calculated based on below logic for each Customer:
  - If Rx(Current Month) >0 and Rx (Last 6 months)=0, then ‘New’
  - Else, Rx(Current Month) >0 and Rx (Last 6 months)>0, then ‘Existing’
  - Else, Rx(Last 3 months) =0 and Rx (Last 12 months)>0, then ‘Lapsed’, Else NA.

NOTE: Rx value for the Prescribers will be sourced form Semantic Xponent Sales Vivitrol and Lybalvi and From Frozen Xponent for Aristada.

	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
New (R6)						No TRx in last 6 months						Has TRx
Existing						Has TRx in last 6 months						Has TRx
Lapsed	TRx in any of these prior 9 months									No TRx	No TRx	No TRx
NA	All Others											

- Product Details like **PROD\_MASTER\_ID** and **PRODUCT\_NAME** will be fetched from SEM\_PRODUCT\_GROUP based on PROD\_DIM\_ID.
- Month will be populated from Split\_Wk\_Dt from SEM\_XPO\_PROJECTED/ SEM\_XPO\_PROJECTED\_FROZEN in ‘YYYY-MM-DD’ format.
- Below Columns will be directly populated from Source

SEM_PRESCRIBER_STATUS	SOURCE_TABLE	SOURCE_COLUMN
ALK_ID	SEM_XPO_PROJECTED/ SEM_XPO_PROJECTED_FROZEN	ALK_ID

#### 4.2.3 C360 DNORM PROCESS

BRD-REQ- OBJ-1	<p><b>Tables Covered</b></p> <ul style="list-style-type: none"> <li>• SEM_C360_WO_POSITION</li> <li>• SEM_C360_W_POSITION</li> <li>• SEM_C360_W_STRENGTH</li> <li>• SEM_C360_W_INDICATION</li> <li>• VW_SEM_C360_W_POSITION</li> <li>• VW_SEM_C360_W_STRENGTH</li> <li>• VW_SEM_C360_WO_POSITION</li> </ul>
BRD-REQ- SEM-1	<ul style="list-style-type: none"> <li>• C360 WO POSITION contains denormalized databased on– ALK_ID, Brand Level, Split Week Id and Time Id. Data will be populated with the Full load strategy and follows the weekly load cadence.</li> <li>• <b>DATE_WEEK and SPLIT_WEEK_DATE will be populated as WEEKENDING_FRIDAY AND SW_END_DATE respectively, from SEM_SPLIT_WEEK_CALENDAR based on DATE.</b></li> </ul> <p><b><u>Call Activity Data</u></b></p> <ul style="list-style-type: none"> <li>• Call Activity Data will be populated for 3 Alkermes brands - Vivitrol, Lybalvi and Aristada</li> <li>• Following fields will be computed using CALLTYPE field from SEM CALL - Calltype_Call_Only, Calltype_Gd_with_Sample, Calltype_Group_Detail</li> <li>• Populate Calltype_Call_Only, Calltype_Gd_with_sample and Calltype_Group_Detail columns by calculating count of CALL_TYPE aggregated on all the values of Call Type (Call Only, Group Detail with Sample and Group Detail)</li> <li>• Following fields will be computed using CALLMETHOD field from SEM CALL - Callmethod_Phone_Count, Callmethod_Email_Count, Callmethod_in_Person_Count, Callmethod_Remote_Count</li> <li>• Populate Callmethod_Phone_Count, Callmethod_Email_Count, Callmethod_in_Person_Count and Callmethod_Remote_Count columns by calculating count of CALL_METHOD aggregated on all the values of Call Method (Phone, Email, (In Person, 'In Person/Remote') and Remote in ('REMOTE','ENGAGE MEETING','WEBEX','WEBINAR','VIRTUAL','CONFERENCE'))</li> </ul> <p><b><u>HCP Samples Data</u></b></p> <ul style="list-style-type: none"> <li>• HCP Samples Data will be populated for 3 Alkermes brands - Vivitrol, Lybalvi and Aristada, only for ORDER_TYPE as 'Enhanced', 'Veeva' and 'Policy'.</li> <li>• Populate Order_Type_Enhanced, Order_Type_Veeva and Order_Type_Policy columns by calculating sum of SAMPLE_QUANTITY aggregated on all the values of ORDER_TYPE</li> </ul> <p><b><u>Hospital Shipment Data</u></b></p> <ul style="list-style-type: none"> <li>• Hospital Shipment Data will be populated for 2 Alkermes brands - Vivitrol and Aristada, only for ORDER_TYPE as 'Initial' and 'Replacement'. Populate Order_Type_Initial and Order_Type_Replacement columns by calculating sum of QUANTITY column aggregated on all the values of ORDER_TYPE</li> </ul> <p><b><u>Hospital Registration Data</u></b></p> <p>Hospital Registration Data will be populated for 2 Alkermes brands - Vivitrol and Aristada, only for STATUS as 'APPROVED' and 'NONAPPROVED'.</p> <ul style="list-style-type: none"> <li>• Populate Status_Approved and Status_NonApproved columns by calculating count of STATUS column aggregated on all the values of STATUS.</li> </ul>

#### **Sales Data**

- Sales Data will be populated for 3 Alkermes brands – Vivitrol, Lybalvi and Aristada
- Populate the columns NRX, TRX, MOT, Sales\_Units and Sales\_Volume\_Units in the C360 layer by calculating sum of NRX, TRX, MOT, Sales\_Units and Sales\_Volume\_Units columns aggregated on ALK\_ID.
- Populate NBRX field from PROJECTED\_TRX of SEM\_IMS\_SOB\_PRESCRIBER\_MONTHLY table aggregated on ALK\_ID where SOB\_DESCRIPTION in ('Add On', 'New Therapy Start', 'Switch') and BRAND\_COMPETITOR\_FLAG = 'B'

#### **Conference Data**

Conference Data will be populated for 3 Alkermes brands – Vivitrol, Lybalvi and Aristada, only for as 'HOSPITALITY', 'BOOTH' and 'PRODUCT THEATRE'.

- Populate Activity\_Hospitality\_Session\_Count, Activity\_Booth\_Session\_Count and Activity\_Product\_Theatre\_Session\_Count columns by calculating sum of SESSION\_COUNT column aggregated on all the values of ACTIVITY.
- Populate Activity\_Hospitality\_Session\_Duration, Activity\_Booth\_Session\_Duration and Activity\_Product\_Theatre\_Session\_Duration columns by calculating sum of SESSION\_DURATION column aggregated on all the values of ACTIVITY.

#### **Marketo Activity Data**

- Marketo Activity Data will be populated for 3 Alkermes brands – Vivitrol, Lybalvi and Aristada, only for below ACTIVITY\_TYPE\_ID. Populate Email\_Sent, Email\_Delivered, Email\_Unsubscribed, Email\_Opened, Email\_Clicked, and Email\_Bounced\_Soft, Email\_Bounced\_Hard, Visit\_Webpage, Fill\_Out\_Form, Click\_Link columns by calculating count of ACTIVITY\_TYPE\_ID column

#### **Precision Trigger**

##### **Record Type Dismiss Count –**

- Populate Recordtype1\_Dismiss\_Count, Recordtype2\_Dismiss\_Count and so on by calculating sum of DISMISS column aggregated on the values of RECORDTYPE; Where RECORDTYPE = RECORDTYPE1, RECORDTYPE2, and so on respectively
- Five placeholder values of Record type will be used in the C360 Deformatized table

##### **Record Type Mark as Complete Count –**

- Populate Recordtype1\_Mark\_As\_Complete\_Count and Recordtype2\_Mark\_As\_Complete\_Count and so on by calculating count of MARK\_AS\_COMPLETE column aggregated on all the values of RECORDTYPE where RECORDTYPE = RECORDTYPE1, RECORDTYPE2, and so on respectively
- Five placeholder values of Recordtype will be used in the C360 Deformatized table.

##### **Priority Dismiss Count**

- Populate Priority1\_Dismiss\_Count and Priority2\_Dismiss\_Count columns and so on by calculating count of DISMISS column aggregated on all the values of PRIORITY; where PRIORITY = PRIORITY1, PRIORITY2, and so on respectively
- Five placeholder values of Priority will be used in the C360 Deformatized table.

##### **Priority Mark as Complete Count**

Populate Priority1\_Mark\_As\_Complete\_Count and Priority2\_Mark\_As\_Complete\_Count columns and so on by calculating count of MARK\_AS\_COMPLETE column aggregated on all the values of PRIORITY; where PRIORITY = PRIORITY1, PRIORITY2, and so on respectively

- Five placeholder values of Priority will be used in the C360 Denormalized table.

#### **Access Monitor Data**

- Access Monitor data will be loaded from SEM\_ACCESS\_MONITOR only for the latest semester.

- Populate the columns as attributes in the DNORM tables as per the mapping mentioned below -

SEMATIC TABLE FIELD	SOURCE FIELD
AM_NO_SEE_RATING	AM_NO_SEE_RATING

TEAMS_CALL_FREQ_REMOTE_SRC_VALUE	TEAMS_CALL_FREQ_REMOTE_SRC_VALUE
TEAMS_CALL_FREQ_REMOTE_LOWER_VALUE	TEAMS_CALL_FREQ_REMOTE_LOWER_VALUE
TEAMS_CALL_FREQ_REMOTE_UPPER_VALUE	TEAMS_CALL_FREQ_REMOTE_UPPER_VALUE

- These are customer attributes and are not a function of the product or anything else.

#### **Promotional Materials Ordered Data**

- Populate the columns Qty\_To\_Promise, Qty\_Ordered and Qty\_Shipped in the C360 layer by calculating sum of Qty\_To\_Promise, Qty\_Ordered and Qty\_Shipped columns aggregated on ALK\_ID

#### **Promotional Materials Delivered Data**

- Promotional Materials Delivered Data is populated for 3 Alkermes brands – Vivitrol, Lybalvi and Aristada
- **Product Type –**
- Product data will be populated from SEM\_PROMO\_MATS\_TBM\_DELIVERED with PRODUCT\_TYPE as 'Demo Kit', 'COPAY CARD', 'CONFERENCE', 'REPRINT', 'Sample Request' and 'PATIENT/CAREGIVER'.
- Populate Product\_Type\_Demo\_Kit, Product\_Type\_Copay\_Card, Product\_Type\_Conference, Product\_Type\_Reprint, Product\_Type\_Sample\_Request and Product\_Type\_Patient\_Caregiver columns by calculating sum of QUANTITY column aggregated on all the values of PRODUCT\_TYPE.
- **Delivery Status –**
- Delivery information will be populated from SEM\_PROMO\_MATS\_TBM\_DELIVERED with DELIVERY\_STATUS as Shipped\_vod, Cancel\_Request\_vod, Cancelled\_vod and Cancelled, Delivered\_vod, In\_Progress\_vod and NULL
- Populate Delivery\_Status\_Shipped, Delivery\_Status\_Cancel\_Request, Delivery\_Status\_Cancelled, Delivery\_Status\_Delivered, Delivery\_Status\_In\_Progress and No\_Delivery\_Status columns by calculating sum of QUANTITY column aggregated on all the values of DELIVERY\_STATUS.

#### **Call Plan Data**

- Call Plan data will be populated for 3 Alkermes brands – Vivitrol, Lybalvi and Aristada, till current quarter based on teams

#### **Planned Calls –**

- Brand Planned Calls will be populated from Planned calls of SEM\_CALL\_PLAN by aggregating data on BRAND

#### **Actual Calls –**

- Brand Actual Calls will be populated from Count of CALL\_ID of SEM\_CALL\_PLAN by data on BRAND

#### **Remaining Calls –**

Remaining Calls is populated by subtracting cumulative sum of actual calls from the planned calls

- These are customer attributes and are not a function of product or anything else.

#### **HCP Affinity Monitor Data**

HCP Affinity Monitor data will be populated from SEM\_AFFINITY\_MONITOR, only for the latest semester.

- Populate the columns by passing all the fields as per the mapping provided below

SEMATIC TABLE FIELD	SOURCE FIELD

	<b>Speaker Attendee Detail Data</b>		
	<ul style="list-style-type: none"> <li>DAYS_SINCE_LAST_EVENT_ATTENDANCE will be populated as difference between Weekending Date and last date of week in which the HCP has attended the program.</li> <li>DAYS_FOR_NEXT_EVENT_ATTENDANCE will be populated as difference between Weekending Date and next date in the next week in which the HCP has attended the program.</li> <li>Compute count of distinct PROGRAM_ID aggregated on ALK_ID, PROD_DIM_ID, SPLIT_WEEK_ID, WEEK_ID and use it to populate NUMBER_OF_EVENTS_ATTENDED field</li> </ul>		

BRD-REQ-  
SEM-2

- C360 W POSITION contains denormalized data based on ALK\_ID, Brand Level, Position ID, TERRITORY ID, Split Week Id and Time Id
- Data will be populated with the Full load strategy and follows the weekly load cadence.
- DATE\_WEEK and SPLIT\_WEEK\_DATE will be populated as WEEKENDING\_FRIDAY AND SW\_END\_DATE respectively, from SEM\_SPLIT\_WEEK\_CALENDAR based on DATE.

#### Call Activity Data

- Call Activity Data will be populated for 3 Alkermes brands - Vivitrol, Lybalvi and Aristada
- Populate CALLTYPE\_CALL\_ONLY\_RATIO, CALLTYPE\_GD\_WITH\_SAMPLE\_RATIO, CALLTYPE\_GROUP\_DETAIL\_RATIO columns by calculating count of CALL\_TYPE divided by NUMBER\_OF\_PRODUCT column aggregated on all the values of Call Type (Call Only, Group Detail with Sample and Group Detail)
- Populate CALLTYPE\_CALL\_ONLY\_COUNT, CALLTYPE\_GD\_WITH\_SAMPLE\_COUNT, CALLTYPE\_GROUP\_DETAIL\_COUNT columns by calculating count of CALL\_TYPE aggregated on all the values of Call Type (Call Only, Group Detail with Sample and Group Detail)
- Populate CALLMETHOD\_PHONE\_RATIO, CALLMETHOD\_EMAIL\_RATIO, CALLMETHOD\_IN\_PERSON\_RATIO, CALLMETHOD\_REMOTE\_RATIO columns by calculating count of CALL\_METHOD divided by NUMBER\_OF\_PRODUCT column aggregated on all the values of Call Method (Phone, Email, (In Person, 'In Person/Remote') and Remote in ('REMOTE', 'ENGAGE MEETING', 'WEBEX', 'WEBINAR', 'VIRTUAL', 'CONFERENCE')) Populate CALLMETHOD\_PHONE\_COUNT, CALLMETHOD\_EMAIL\_COUNT, CALLMETHOD\_IN\_PERSON\_COUNT, CALLMETHOD\_REMOTE\_COUNT columns by calculating count of CALL\_METHOD aggregated on all the values of Call Method (Phone, Email, (In Person, 'In Person/Remote') and Remote in ('REMOTE', 'ENGAGE MEETING', 'WEBEX', 'WEBINAR', 'VIRTUAL', 'CONFERENCE'))
- PRODUCT\_POSITION\_1: These columns depict the number of calls for which the position of the product in the grain will be 1 in that week.
- PRODUCT\_POSITION\_2: These columns depict the number of calls for which the position of the product in the grain will be 2 in that week.
- PRODUCT\_POSITION\_3: These columns depict the number of calls for which the position of the product in the grain will be 3 in that week.
- PRODUCT\_POSITION\_4: These columns depict the number of calls for which the position of the product in the grain will be 4 in that week.
- PRODUCT\_POSITION\_5: These columns depict the number of calls for which the position of the product in the grain will be 5 in that week.

#### HCP Samples Data

- HCP Samples Data is populated for 3 Alkermes brands - Vivitrol, Lybalvi and Aristada, only for ORDER\_TYPE = 'Enhanced', 'Veeva' and 'Policy'.
- Populate Order\_Type\_Enhanced, Order\_Type\_Veeva and Order\_Type\_Policy columns by calculating sum of SAMPLE\_QUANTITY aggregated on all the values of ORDER\_TYPE

#### Access Monitor Data

- Access Monitor Data will be populated from SEM\_ACCESS\_MONITOR only for latest semester.

Populate the columns as attributes in the DNORM tables as per the mapping mentioned below -

SEMATIC TABLE FIELD	SOURCE FIELD

TEAMS_CALL_FREQ_REMOTE_UPPER_VALUE	TEAMS_CALL_FREQ_REMOTE_UPPER_VALUE

- These are customer attributes and are not a function of the product or anything else.

#### Promotional Materials Delivered Data

- Promotional Materials Delivered Data is populated for 3 Alkermes brands – Vivitrol, Lybalvi and Aristada

#### Product Type –

- Populate Product\_Type\_Demo\_Kit, Product\_Type\_Copay\_Card, Product\_Type\_Conference, Product\_Type\_Reprint, Product\_Type\_Sample\_Request and Product\_Type\_Patient\_Caregiver columns from SEM\_PROMO\_MATS\_TBM\_DELIVERED table by calculating sum of QUANTITY column aggregated on all the values of PRODUCT\_TYPE ('Demo Kit', 'COPAY CARD', 'CONFERENCE', 'REPRINT', 'Sample Request', 'PATIENT/CAREGIVER')

#### Delivery Status –

Populate Delivery\_Status\_Shipped, Delivery\_Status\_Cancel\_Request, Delivery\_Status\_Cancelled, Delivery\_Status\_Delivered, Delivery\_Status\_In\_Progress and No\_Delivery\_Status columns from SEM\_PROMO\_MATS\_TBM\_DELIVERED table by calculating sum of QUANTITY column aggregated on all the values of DELIVERY\_STATUS (Shipped\_vod, Cancel\_Request\_vod, Cancelled\_vod and Cancelled, Delivered\_vod, In\_Progress\_vod and NULL)

#### Call Plan Data

- Call Plan data will be populated for 3 Alkermes brands – Vivitrol, Lybalvi and Aristada, till current quarter based on teams

#### Planned Calls –

- Brand Planned Calls will be populated from Planned calls of SEM\_CALL\_PLAN by aggregating data on BRAND

#### Actual Calls –

- Brand Actual Calls will be populated from Count of CALL\_ID of SEM\_CALL\_PLAN by data on BRAND

#### Remaining Calls –

Remaining Calls is populated by subtracting cumulative sum of actual calls from the planned calls

These are customer attributes and are not a function of the product or anything else. **HCP Affinity Monitor Data**

- Load only latest semester of data in the DNORM tables.
- Populate the columns by passing all the fields as per the mapping provided below

SEMATIC TABLE FIELD	SOURCE FIELD

- Following fields are computed using Product Position field from SEM CALL - PRODUCT\_POSITION\_1\_COUNT, PRODUCT\_POSITION\_2\_COUNT, PRODUCT\_POSITION\_3\_COUNT, PRODUCT\_POSITION\_4\_COUNT, PRODUCT\_POSITION\_5\_COUNT
- INDICATION\_POSITION\_1: These columns depict the number of calls for which the position of the indication in the grain will be 1 in that week.
- INDICATION\_POSITION\_2: These columns depict the number of calls for which the position of the indication in the grain will be 2 in that week.
- INDICATION\_POSITION\_3: These columns depict the number of calls for which the position of the indication in the grain will be 3 in that week.
- INDICATION\_POSITION\_4: These columns depict the number of calls for which the position of the indication in the grain will be 4 in that week.
- INDICATION\_POSITION\_5: These columns depict the number of calls for which the position of the indication in the grain will be 5 in that week.

#### **HCP Samples Data**

- HCP Samples Data is populated for 3 Alkermes brands - Vivitrol, Lybalvi and Aristada, only for ORDER\_TYPE = 'Enhanced', 'Veeva' and 'Policy'.
- Populate Order\_Type\_Enhanced, Order\_Type\_Veeva and Order\_Type\_Policy columns by calculating sum of SAMPLE\_QUANTITY aggregated on all the values of ORDER\_TYPE

#### **Access Monitor Data**

- Load only latest semester of data in the DNORM tables.
- Populate the columns as attributes in the DNORM tables as per the mapping mentioned below -

#### 4.4 ALIGNMENT

- Alignment feeds will be received in the CDE system and will be received from Javelin (ZS) on a weekly frequency.
  - ZIP\_TERRITORY
  - CUSTOMER\_TERRITORY
  - POSITION\_TERRITORY
  - PRODUCT\_POSITION
  - CUSTOMER\_POSITION\_PRODUCT

2. The frozen snapshots for the above Alignment feeds from ZS will be available quarterly.
  - CUSTOMER\_TERRITORY\_FROZEN
  - POSITION\_TERRITORY\_FROZEN
  - PRODUCT\_POSITION\_FROZEN
  - CUSTOMER\_POSITION\_PRODUCT\_FROZEN
3. Time Off Terr Details will be obtained from Veeva.
4. Customer Position Geography will be created in the CDE System.
5. ZIP to Territory mapping for hybrid and pure teams will be created in CDE System.

## 4.5 CUSTOMER PROCESSES

### 4.5.1 TIER

For Aristada and Lybalvi, Customer Tiers will be sourced from Alkermes Business feed (Tier Universe) whereas for Vivitrol, the same will be sourced from Veeva (Tiers for Addiction team were last populated in May-21)

S.No.	Requirement
BRD-REQ-RAW-1	<b>Feed Id:</b> 565 <b>Feed Name:</b> Tier_Universe <b>Feed Description:</b> This feed provides Customer Tier Categorization for Aristada and Lybalvi. <b>Source:</b> Alkermes <b>Subject Area:</b> Customer <b>Markets:</b> Psychiatry <b>Products:</b> Aristada, Lybalvi. <b>Load strategy (Incremental/ Full) –</b> Incremental <b>Restatement (Yes/ No):</b> Yes (Only if multiple files are shared for same quarter) <b>Frequency (Daily/ Weekly/ Monthly/ Quarterly/ Ad hoc) –</b> Ad-hoc <b>File Receipt Day/ Date (in case of Weekly/ Monthly/ Quarterly)-</b> Ad-hoc <b>MDM Mastering (Yes/No) –</b> No
BRD_REQ_EXN_2	<b>Data Description:</b> This feed provides Customer Tier Categorization for Vivitrol. (For Addiction Tiers XREF_DATA_FREEZE_DETAIL was last updated on May-21, so last updated tiers for Addiction team was populated on May-21 only.) <b>Subject Area:</b> Customer <b>Source:</b> Veeva CRM <b>Source table:</b> Account <b>Markets:</b> Addiction <b>Products:</b> Vivitrol <b>Load strategy (Incremental/ Full) –</b> Full <b>Restatement (Yes/ No):</b> No <b>Frequency (Daily/ Weekly/ Monthly/ Quarterly/ Adhoc) –</b> Daily <b>File Receipt Day/ Date (in case of Weekly/ Monthly/ Quarterly)-</b> NA <b>MDM Mastering (Yes/No) –</b> No
BRD-REQ-OBJ-3	<b>Tables/Views Covered –</b> <ul style="list-style-type: none"> <li>RAW_CUSTOMER_TIER</li> <li>CLNS_CUSTOMER_TIER</li> <li>SEM_CUSTOMER_TIER</li> <li>VW_SEM_CUSTOMER_TIER</li> </ul>
BRD-REQ-SEM-4	For <b>Aristada and Lybalvi</b> , Tier information will be directly sourced from the Business feed. If multiple files will be shared in for the same quarter, then restatement will be based on below fields: TEAM_DIM_ID, TEAM_NAME, PRODUCT_MASTER_ID, PRODUCT_MASTER_NAME, INDICATION_ID, INDICATION, END_DATE <ul style="list-style-type: none"> <li><b>Customer ID</b> will be fetched from Customer Master based on ALKID.</li> <li>In case of multiple Tiers for same Customer and Team combination in a Quarter, the highest Tier should be considered as per below:</li> </ul>

Brand	Priority Order
Aristada	1>2 > 3 > A > B > C > VA/HIS
Lybalvi	1> 2 > 3 > A+ > A > B > C > VA/HIS > TIER 2 HIGH VALUE > TIER 2 MEDIUM VALUE > TIER 2 OTHER

- Below fields are directly populated from source for Aristada and Lybalvi-

Semantic Table Field	Source Field
TEAM_DIM_ID	TEAM_DIM_ID
TEAM_NAME	TEAM_NAME
PRODUCT_MASTER_ID	PRODUCT_MASTER_ID
PRODUCT_MASTER_NAME	PRODUCT_MASTER_NAME
INDICATION_ID	INDICATION_ID
INDICATION	INDICATION
START_DATE	START_DATE
END_DATE	END_DATE
TIER	TIER

For **Vivitrol**, Tiers for HCOs will be sourced from Veeva Accounts object for every Quarter based on Freeze date from XREF\_DATA\_FREEZE\_DETAIL. (Vivitrol Tiers are present from Apr'16 till Jun'21 only)

- Team information** (Team Name) will be defaulted to 'Addiction'.
- Customer ID** will be fetched from Customer Master based on ALKID.
- Product details** will be fetched from Product Group.
- In case of multiple Tiers for same Customer and Team combination in a Quarter, the highest Tier should be considered as per below:

Brand	Priority Order
Vivitrol	Primary Gold/Primary > Primary Silver > Secondary > Prospecting > non-Priority

- Tier Status for Child Accounts (HCPs) will be populated from Veeva Accounts object using Customer Affiliation table based on Alk\_ID.
- Update date** field will capture the date when Alk\_id updates are observed.
- Below fields are directly populated from source for Vivitrol-

Semantic Table Field	Source Field (Veeva CRM Account)
TIER	CURRENT_QTR_SEGMENTATION_C

- VW\_SEM\_CUSTOMER\_TIER** will hold Tier details latest available Quarter and all historical Quarters for Addiction and Psychiatry teams starting April 2016.

- **Customer details** will be fetched from Customer Dimension table based on IMS\_DR\_NUM.
- **Specialty details** will be fetched from Specialty Dimension table based on Customer Dimension Id.
- **Product details** will be fetched from Product dimension based on Product Group Number and the respective markets (IQVIA ADDICTION and IQVIA FULL ANTI-PSYCHIATRY).
- **Weekend Date Dim Id** will be populated as Calendar ID from Calendar based on week-end date derived from DATA\_DT field for each week.
- **Split week Id** will be populated as Id from Split Week Calendar Dimension based on week-end date derived from DATA\_DT field for each week.
- **Data Freeze Logic:** Post completion of each Quarter, XPO data will be considered **Frozen** when the freeze date in XREF\_DATA\_FREEZE\_DETAIL equals current date. Frozen data will be loaded to FCT\_XPO\_PROJECTED\_FROZEN\_M (Addiction market), FCT\_XPO\_PROJECTED\_FROZEN\_W (Psychiatry Market).

BRD-REQ-SEM-4

- Live Xponent data will be refreshed weekly for Psychiatry and Addiction market. The refreshes will include Reinstated sales data for last 2 years along with data for latest completed week(XPO data is received in a lag of 2 week). Complete XPO sales history is available in Semantic.
  - 128 weeks of sales data will be received from source is already bucketed in line with split weeks and segregated under DATA\_BUCKTs. DATA\_DT will be used to identify which DATA\_BUCKT corresponds to which week.For Eg. If DATA\_DT is '2023-07-07' then
  - DATA\_BUCKT\_1 will hold data for latest week (2023-07-07 to 2023-07-01)
  - DATA\_BUCKT\_2 will hold data for the prior week (2023-06-30 to 2023-06-24) and so on till DATA\_BUCKT\_128.
- Data for Psychiatry and Full Anti-Psych markets will be received in same feed and segregated using Market Name from Market Basket. If the Market Name is 'ANTI-PSYCH - ATYPICAL + TYPICAL LAI' then the source market is 'PSYCHIATRY' else 'FULL ANTI-PSYCH'.
- Frozen Xponent Sales in semantic will include Xponent data for Frozen Quarter, Current Quarter, and Adjustments.
  - Frozen XPO data refers to XPO data for all completed Quarters. Data for the Quarter will be considered Frozen when the freeze date in XREF\_DATA\_FREEZE\_DETAIL equals current date.
  - Current Quarter XPO data refers to data for ongoing quarter.
  - Sales Adjustments refers to the adjusted sales shared by business for Source='XPO'.
- **Sales Adjustment Flag** will be defaulted to 'TRUE' for adjusted XPO data and 'FALSE' for other XPO received from IQVIA.
- TRX, NRX, TQTY, NQTY, Units and MOT will be calculated basis below logic for Psychiatry and Addiction Market:

Metrics	Psychiatry	Addiction
TRX	TRX	TRX
NRX	NRX	NRX
TQTY	TQTY	TQTY
NQTY	NQTY	NQTY
Units	TQTY * TQTY_UNITS_CONV_FACTOR	TQTY * TQTY_UNITS_CONV_FACTOR
MOT	TQTY *TQTY_UNITS_CONV_FACTOR * MOT_CONV_FACTOR	TQTY *TQTY_UNITS_CONV_FACTOR * MOT_CONV_FACTOR

MOT\_CONV\_FACTOR and TQTY\_UNITS\_CONV\_FACTOR will be fetched from Product Master based on Product Group Number and the respective markets.

- **Customer and Specialty details** will be populated from Customer Master based on SRA\_1(IMS\_DR\_NUM) and SRA\_3(PRESCRIBER SPECIALTY) respectively.
- **Product and Brand details** will be populated from Product Master based on Product Group Number and the respective markets.
- **Sales Category Name** will be populated as Description from Map Code based on category code, with entity type as 'ACCOUNT' and Code type as 'SALES\_CATEGORY\_CD'.
- **AL90S\_EXCLUSION\_FLAG** will be populated as per below logic:
  - For Psychiatry it will be defaulted as '0' if Prescriber Id is Blank or, starts with '95', '97', '98' or '99' else will be defaulted as '1'.
  - For Addiction it will be defaulted as '1'.
- Week, Split Week Date and Month will be populated as per below logic:
  - For Psychiatry market:
    - **Week** will be populated as Weekending Friday from Calendar Dimension based on week-end date derived from DATA\_DT field for each week.
    - **Split week date** and **Month** will be populated as Split weekend date and Calendar month Start Date from Split Week Calendar Dimension based on week-end date derived from DATA\_DT field for each week.
  - For Addiction market:
    - **Week** and **Split week date** will be populated as NULL.
    - **Month** will be populated as Complete date from Split Week Calendar Dimension based on Month-end date derived from DATA\_DT field for each month.
- Below fields are directly populated from source:

Semantic Table Field	Source Field (Psychiatry)	Source Field (Addiction)
SOURCE_PRESCRIBER_ID	SRA_1	IMS_DR_NUM
SALES_CATEGORY_CD	SALES_CATEGORY_CD	CATEGORY_CD
SOURCE_PLAN_ID	SRA_2	PLAN_CD

#### 4.9.6 SPECIALTY PHARMACY

BRD-REQ-RAW-1

Feed Details:

CLNS_BERRY_SWEENEY_SHIP	BEERY																
BRD-REQ-SEM-3	<ul style="list-style-type: none"><li>Aggregated Shipment data from all the sources- Genoa Ari, Genoa Viv, Berry &amp; Sweeney, Perform, Capgemini will be available in Semantic where history will also be maintained.</li></ul> <p>Restatement logic applied for liquid hub and genoa as per below logic and for remaining sources data is loaded incrementally without any specific restatement logic.</p> <ul style="list-style-type: none"><li>Restatements for Liquid hub:<ul style="list-style-type: none"><li>Restatements will be processed based on the LH_SHIPMENT_KEY.</li><li>All records with an UPDATE_TIMESTAMP in the latest file will be inserted.</li></ul></li></ul>																

- If data for the LH\_SHIPMENT\_KEY received in the latest file is already available in Warehouse, the following fields will be updated from the latest file against that Shipment Record in Warehouse -: HUB\_PATIENT\_ID, ICD9\_CODE, NDC, PHARMACY\_NAME, PRESCR\_ADDR1, PRESCR\_ADDR2, PRESCR\_CITY, PRESCR\_STATE, PRESCR\_ZIP, INSURANCE\_GROUP\_ID, PAYER\_NAME, PLAN\_NAME, INITIAL\_PRESCR\_SOURCE, MASKED\_PATIENT\_ID.

- **Genoa:** Genoa feed will contain shipments for rolling five weeks- Current week and restatements in previous four weeks. Previous four weeks data will be replaced with data present in latest file.

- **Customer Details** like Name and ALKID will be populated from Customer Master based on SP\_PRESCRIBER\_ID.
- **Product and Brand** details will be populated from Product Master based on NDC\_11.
- **DIRECT\_PHARMACY\_NAME** and **PARENT\_NAME\_REPORTING** will be populated from XREF\_NATIONAL\_SP based on NATIONAL\_SP\_ID. SP\_NAME as Direct Pharmacy Name and PARENT\_NAME\_REPORTING as PARENT\_NAME\_REPORTING
  - Sample Data for XREF\_NATIONAL\_SP:

NATIONAL_SP_ID	SP_NAME	PARENT_NAME	PARENT_NAME_REPORTING
SP0061	KOHL'S PHARMACY AND HOMECARE	ASEMBIA GPO	ASEMBIA

- **DP\_NATIONAL\_ID** will be populated as NATIONAL\_SP\_ID from XREF\_SOURCE\_NAME\_TO\_NATIONAL\_SP based on source name from meta table (data feed meta) with DATA\_PROVIDER from Xref.
  - XREF\_SOURCE\_NAME\_TO\_NATIONAL\_SP, This XREF contains Data Provider, Pharmacy Name and National SP ID. Sample data in XREF:

DATA_PROVIDER	DISPLAY_NAME	NATIONAL_SP_ID	PROCESSED_DATE
GENOA	GENOA	SP0095	2023-09-15 00:00:00.000

- **DATA\_SOURCE\_PROVIDER** will be populated as SOURCE\_NAME from DATA\_FEED\_META.
- **MOT** = MOT\_CONV\_FACTOR \* QUANTITY  
Where, MOT\_CONV\_FACTOR will be fetched from the DIM\_PROD\_MSTR based on PROD\_DIM\_ID
- **ADJUSTED\_DATE\_MONTH** will be populated as adjusted ship (Logic mentioned below) if sales adjustment flag is 'False' else calendar month start date from Split Week Calendar table based on Split week Id.
- **ADJUSTED\_SHIP\_DT** will be populated as 'Data Month' based on the maximum no of shipments for that month in the file. For example: If FILE\_ID-1234 has records count as ~25 for month Aug-2022 and ~39 for month June 2022 then 2022-06-01 will be populated as ADJUSTED SHIP\_DT.
  - Shipments in each file which are dated prior to the 'Data Month' for the file should be adjusted to have a date of the first day of the 'Data Month'.
  - For Genoa, **ADJUSTED\_SHIP\_DT** will be same as Ship date.
  - **ADJUSTED\_SHIP\_DT** is not calculated for the historical data as there is no File ID information.
- **SHIP\_DATE** and **SHIP\_WEEK** will be populated as complete date and weekending Friday respectively, from Semantic Calendar based on SHIP\_DT.
- **SHIP\_SPLIT\_WEEK\_DATE** will be populated from Split Week Calendar based on SHIP\_DT.

- Below fields will be directly mapped from source.

- **Product details** (Product Master Level, Product Master Id, Product Master Name) will be populated from Product Master based on Product Id received from source.
  - **Product Master Level** will be either PRODUCT (hardcoded), Product Group Type (Dynamic), MARKET (hardcoded) from Product Master. Product Group, Market Basket respectively based on Product Id.
  - **Product Master Id** will be populated as Product Dimension Id, Product Group Dimension Id, Market Dimension Id from Product Master. Product Group, Market Basket respectively based on Product Id.
  - **Product Master Name** will be populated as Product Name, Product Group Name, Market Name from Product Master. Product Group, Market Basket respectively based on Product Id.
- **Sales Category Name** will be populated as Description from Map Code based on category code, with entity type as 'ACCOUNT' and Code type as 'SALES\_CATEGORY\_CD'.
- **TEAM NAME** will be populated from Team Master based on Team Dimension Id.
- **ORG\_UNIT\_LEVEL\_NAME** will be populated from **Geography Hierarchy Frozen Mapping** based on **ORG\_UNIT\_ID** from Geography.
- **Customer details** (CUST\_DIM\_ID) will be populated from Customer Master based on Alkermes Id.
- Below fields are directly populated from the source:

Target fields	Source fields
SALES_CATEGORY_CD	CHANNEL_ID
ALIGNMENT_TYPE	ALIGNMENT_TYPE
ORG_UNIT_ID	ORG_UNIT_ID
TEAM_DIM_ID	TEAM_ID
DATA_TYPE	DATA_TYPE
TIME_PERIOD	TIME_ID
METRIC_VALUE	METRIC_VAL
PDRP_FLAG	PDRP_FLAG
MASTER_EXCLUSION_FLAG	MASTER_EXCLUSION_FLAG
PROCESSING_DATE	PROCESSING_DT

#### **SEM CUSTOMER LEVEL CREDITED SALES VOLUME:**

- Customer Level credited sales goals will be populated in Semantic from Weekly Reporting, Incentive Compensation and Goal Setting feeds received from ZS, where History will also be maintained.
- Records with **Metric Id = "Volume"** will be considered.
- **UNIT\_NAME** will be fetched from **Metric Id**. The part after hyphen ('-') will be the UNIT\_NAME.

Metric Id	Unit_Name
Volume-MOT	MOT
Volume-Unit	Unit

- **TIME\_PERIOD** will be populated as Time Id (YYYYMMDD) received from the source.
  - Exception being when the value of Data Type is 'Demand\_Sales\_Monthly' then the date (DD) in the Time ID (YYYYMMDD) defaulted to first of the month.
- **Product details** (Product Master Level, Product Master Id, Product Master Name) will be populated from Product Master based on Product Id received from source.
  - **Product Master Level** will be either PRODUCT (hardcoded), Product Group Type (Dynamic), MARKET (hardcoded) from Product Master. Product Group, Market Basket respectively based on Product Id.
  - **Product Master Id** will be populated as Product Dimension Id, Product Group Dimension Id, Market Dimension Id from Product Master. Product Group, Market Basket respectively based on Product Id.

- **Product Master Name** will be populated as Product Name, Product Group Name, Market Name from Product Master. Product Group, Market Basket respectively based on Product Id.
- **Sales Category Name** will be populated as Description from Map Code based on category code, with entity type as 'ACCOUNT' and Code type as 'SALES\_CATEGORY\_CD'.
- **TEAM NAME** will be populated from Team Master based on Team Id.
- **ORG\_UNIT\_LEVEL\_NAME** will be populated from **Geography Hierarchy Frozen Mapping** based on **ORG\_UNIT\_ID** from Geography.
- **Customer details** (CUST\_DIM\_ID) will be populated from Customer Master based on CUST\_ID.
- Below fields are directly populated from the source:

Target Table fields	Source fields
SALES_CATEGORY_CD	CHANNEL_ID
ALIGNMENT_TYPE	ALIGNMENT_TYPE
ORG_UNIT_ID	ORG_UNIT_ID
TEAM_DIM_ID	TEAM_ID
DATA_TYPE	DATA_TYPE
METRIC_VALUE	METRIC_VAL
PDRP_FLAG	PDRP_FLAG
MASTER_EXCLUSION_FLAG	MASTER_EXCLUSION_FLAG
PROCESSING_DATE	PROCESSING_DT

**Sales Volume Address** (VW\_SEM\_CUST\_LEVEL\_CREDITED\_SALES\_VOLUME\_CUST\_ADDR):

- Customer Level credited sales Volume will be populated from SEM\_CUSTOMER\_LEVEL\_CREDITED\_SALES\_VOLUME where history will also be maintained.
- **Address details** (ADDR\_ALK\_ID, ADDR\_DIM\_ID, ADDRESS\_LINE\_1, CITY, STATE, ZIP, ZIP\_EXT, ADDRESS\_TYPE) will be populated from Customer Master based on CUST\_ID and Team Id.

#### 4.9.11 DEMAND SALES PSYCHIATRY

S.No.	Requirement
BRD-REQ-SEM-1	Demand Sales Psychiatry is comprised of the Sales Data for Psychiatry market along with Affiliation, Address, Target, Segment, Tier, Decile and Live Alignment details for the customers in Psychiatry Market.
BRD-REQ-OBJ-2	<p><b>Tables Covered –</b></p> <ul style="list-style-type: none"> <li>• SEM_DEMAND_SALES_PSYCHIATRY</li> <li>• RPT_DEMAND_SALES_PSYCHIATRY</li> <li>• VW_PSYCHIATRY_CP_TARGET</li> <li>• VW_PSYCHIATRY_SEGMENT</li> <li>• VW_PSYCHIATRY_TIER</li> </ul>
BRD-REQ-SEM-3	<ul style="list-style-type: none"> <li>• Demand Sales Psychiatry will contain sales data for Aristada and Lybalvi along with the competitor's data from SEM_DEMAND_SALES_COMPONENT.</li> <li>• <b>Child Account type</b> details (CHILD_ACCOUNT_TYPE, CHILD_ACCOUNT_SUB_TYPE, CHILD_ACCOUNT_SUPER_TYPE, CHILD_ACCOUNT_CLASS_TYPE and CHILD_ACCOUNT_SETTING_OF_CARE) will be populated from Customer Master based on Customer Dimension Id.</li> <li>• <b>CHILD_CUSTOMER_NAME</b> will be populated from Customer Master based on Customer Dimension Id along with below condition: <ul style="list-style-type: none"> <li>○ If Party Name will be like '%ENCUMBERED%' then concatenation of PARTY_NAME and ZIP.</li> <li>○ If PDRP FLAG will be 'Y' then 'Restricted Prescriber'</li> <li>○ If ACCOUNT_SUPER_TYPE will be 'HCO' and PDRP_FLAG as 'N' then PARTY_NAME</li> <li>○ If MIDDLE_NAME will not be blank then concatenation of FIRST_NAME, MIDDLE_NAME and LAST_NAME.</li> <li>○ Else, it will be populated as concatenation of FIRST_NAME and LAST_NAME.</li> </ul> </li> <li>• <b>Address Details</b> (CHILD_CUSTOMER_ADDRESS, CHILD_CUSTOMER_CITY, CHILD_CUSTOMER_STATE and CHILD_CUSTOMER_ZIP) will be populated from Customer Master based on Customer Dimension ID and NULL if PDRP_FLAG will be 'Y'.</li> </ul>

	<ul style="list-style-type: none"> <li>• <b>CHILD_CUSTOMER_SPECIALTY</b> will be populated as PRIMARY_SPECIALTY from Customer Master based on Customer Dimension ID.</li> <li>• <b>CHILD_CUSTOMER_DECILE_ALAI</b> will be populated from SEM_CUSTOMER_DECILE based on Customer Dimension ID for latest available quarter with VAL_SCOPE as 'ALAI' and PERIOD_TYPE as 'MONTH' and PERIOD as 'R12' and DECILE_SCOPE as 'GROUP' and CUST_TYPE as 'IND' and DATA_TYPE as 'XPO' and SALES_UNITS as 'TRX' and PROJECTED_ENHANCED as 'PROJECTED' and FROZEN_CURRENT as 'FROZEN'.</li> <li>• <b>CHILD_CUSTOMER_DECILE_ORAL_BRANDED</b> will be populated from SEM_CUSTOMER_DECILE based on Customer Dimension ID for latest available quarter with VAL_SCOPE as 'Anti-Psych - Atypical branded oral' and PERIOD_TYPE as 'MONTH' and PERIOD as 'R12' and DECILE_SCOPE as 'MARKET' and CUST_TYPE as 'IND' and DATA_TYPE as 'XPO' and SALES_UNITS as 'TRX' and PROJECTED_ENHANCED as 'PROJECTED' and FROZEN_CURRENT as 'CURRENT'.</li> <li>• <b>CHILD_CUSTOMER_DECILE_ORAL</b> will be populated from SEM_CUSTOMER_DECILE based on Customer Dimension ID for latest available quarter with VAL_SCOPE as 'Anti-Psych - Atypical oral' and PERIOD_TYPE as 'MONTH' and PERIOD as 'R12' and DECILE_SCOPE as 'MARKET' and CUST_TYPE as 'IND' and DATA_TYPE as 'XPO' and SALES_UNITS as 'TRX' and PROJECTED_ENHANCED as 'PROJECTED' and FROZEN_CURRENT as 'CURRENT'.</li> <li>• <b>Tier details</b> (CHILD_CUSTOMER_ARISTADA_TIER and CHILD_CUSTOMER_LYBALVI_TIER) will be populated from Customer Tier based on Customer Dimension Id for the respective products (Aristada and Lybalvi).</li> <li>• <b>Segment details</b> (CHILD_CUSTOMER_ARISTADA_BEHAVIORAL_SEGMENT and CHILD_CUSTOMER_LIKELY_ADOPTER_FLAG) will be populated from SEM_CUSTOMER_SEGMENTATION based on Customer Dimension Id for the respective product segments (ARISTADA BEHAVIORAL SEGMENT -1 and Lybalvi Likely Adopter).</li> <li>• <b>Call Plan target details</b> (CHILD_CUSTOMER_ARISTADA_CP_TARGET, CHILD_CUSTOMER_LYBALVI_SCZ_CP_TARGET, CHILD_CUSTOMER_LYBALVI_BP_CP_TARGET and CHILD_CUSTOMER_CP_TARGET) will be fetched from SEM_CALL_PLAN based on Customer Dimension Id for the respective product and indication combination till current quarter.</li> <li>• <b>Target details</b> (CHILD_CUSTOMER_ARISTADA_BRAND_TARGET, CHILD_CUSTOMER_LYBALVI_SCZ_BRAND_TARGET, CHILD_CUSTOMER_LYBALVI_BP_BRAND_TARGET and CUSTOMER_BRAND_TARGET) will be fetched from SEM_CUSTOMER_TARGET based on Customer Dimension Id for the respective product and indication combination.</li> <li>• <b>CONCATENATE_BRAND_TARGET</b> will be populated as concatenation of CHILD_CUSTOMER_ARISTADA_BRAND_TARGET, CHILD_CUSTOMER_LYBALVI_SCZ_BRAND_TARGET and CHILD_CUSTOMER_LYBALVI_BP_BRAND_TARGET</li> <li>• <b>Alignment Details</b> (TERRITORY_ID, TERRITORY_NAME, DISTRICT_ID, DISTRICT_NAME, REGION_ID and REGION_NAME) will be populated from SEM_CUSTOMER_POSITION_GEOGRAPHY based on ALK_ID, TEAM_DIM_ID and PRODUCT_MASTER_NAME with ALIGNMENT_TYPE as 'LIVE' and TEAM_NAME as 'PSYCHIATRY'.</li> <li>• <b>CHANNEL, PAYER_GROUP, PAYER and PLAN</b> will be populated as PLAN_TYPE_ALKS_CHANNEL_ROLLUP, GRAND_PARENT_NAME, PARENT_NAME and ENTITY_NAME respectively, from SEM_PLAN_MASTER based on SOURCE_PLAN_ID with ENTITY_TYPE as 'PLAN' and PARENT_ENTITY_TYPE as 'PAYER ENTITY'.</li> <li>• <b>PRODUCT_GROUP</b> will be populated as RPT_PROD_GROUP from SEM_PRODUCT_GROUP based on PROD_DIM_ID.</li> <li>• <b>BRAND</b> will be populated from SEM_DEMAND_SALES_COMPONENT. <ul style="list-style-type: none"> <li>○ For Product Group "Typical LAI", Brand should be populated as "<b>TYPICAL LAI</b>".</li> <li>○ For Product Group "<b>ATYPICAL GENERIC LAI</b>", both brands RISPERDAL CONSTA and RISPERIDONE should be grouped together as RISPERIDONE leveraging the SEM PRODUCT GROUP table.</li> </ul> </li> <li>• <b>STRENGTH</b> will be populated from SEM_PRODUCT_MASTER based on PROD_DIM_ID.</li> <li>• <b>UNITS, MOT, and VOLUME_UNITS</b> will be populated as below: <ul style="list-style-type: none"> <li>○ UNITS = UNITS * COALESCE(SPLIT_FACTOR,1)</li> <li>○ MOT = MOT * COALESCE(SPLIT_FACTOR,1)</li> <li>○ VOLUME_UNITS = VOLUME_UNITS * COALESCE(SPLIT_FACTOR,1)</li> </ul> </li> </ul>
--	---

SPLIT\_FACTOR will be fetched from VW\_SEM\_CUSTOMER\_TERRITORY\_SPLIT based on ALK\_ID, ALIGNMENT\_TYPE, TEAM\_DIM\_ID and TERRITORY\_ID.

- **PARENT\_ALK\_ID** will be populated as per below logic:
    - 'Restricted Prescriber' if PDRP\_FLAG will be 'Y' and ACCOUNT\_SUPER\_TYPE as 'IND', which will be fetched from CUSTOMER MASTER based on Customer Dimension Id.
    - It will be populated as ALK\_ID from SEM\_DEMAND\_SALES\_COMPONENT if the CUST\_DIM\_ID will not be in CUSTOMER AFFILIATION or ACCOUNT\_SUPER\_TYPE from CUSTOMER MASTER will be 'HCO'.
    - Else, it will be populated as PARENT\_ALK\_ID from CUSTOMER AFFILIATION based on Customer Dimension Id.
  - **PARENT\_ACCOUNT\_TYPE and PARENT\_ACCOUNT\_SUB\_TYPE** will be NULL if PDRP\_FLAG and ACCOUNT\_SUPER\_TYPE will be 'Y' and 'IND' respectively, else, will be populated as ACCOUNT\_TYPE and ACCOUNT\_SUB\_TYPE from CUSTOMER MASTER based on CUST\_DIM\_ID. CUST\_DIM\_ID will be derived as per below logic:
    - If the CUST\_DIM\_ID will not be in CUSTOMER AFFILIATION or ACCOUNT\_SUPER\_TYPE from CUSTOMER MASTER will be 'HCO' then from SEM\_DEMAND\_SALES\_COMPONENT.
    - Else, PARENT\_CUST\_DIM\_ID from CUSTOMER AFFILIATION based on CUST\_DIM\_ID and TEAM\_DIM\_ID.
  - **PARENT\_CUSTOMER\_NAME** will be populated from Customer Master based on Customer Dimension Id along with below condition:
    - If Party Name will be like '%ENCUMBERED%' then concatenation of PARTY\_NAME and ZIP.
    - If PDRP\_FLAG and ACCOUNT\_SUPER\_TYPE will be 'Y' and 'IND' respectively, then 'Restricted Prescriber'.
    - If ACCOUNT\_SUPER\_TYPE will be 'HCO' then PARTY\_NAME
    - If MIDDLE\_NAME will not be blank then concatenation of FIRST\_NAME, MIDDLE\_NAME and LAST\_NAME.
    - Else, it will be populated as concatenation of FIRST\_NAME and LAST\_NAME.
- CUST\_DIM\_ID will be derived as per below logic:
- If the CUST\_DIM\_ID will not be in CUSTOMER AFFILIATION or ACCOUNT\_SUPER\_TYPE from CUSTOMER MASTER will be 'HCO' then from SEM\_DEMAND\_SALES\_COMPONENT.
  - Else, PARENT\_CUST\_DIM\_ID from CUSTOMER AFFILIATION based on CUST\_DIM\_ID and TEAM\_DIM\_ID.
- **TIME\_PERIOD\_GROUP** will serve to determine if a specific week or month falls within the preceding or ongoing rolling periods of 1, 3, 6, 12, or 13 weeks or months. It will also ascertain whether the given week or month falls within the preceding and current quarter and year.
  - **Parent Address Details** (PARENT\_CUSTOMER\_ADDRESS, PARENT\_CUSTOMER\_CITY, PARENT\_CUSTOMER\_STATE and PARENT\_CUSTOMER\_ZIP) will be NULL if PDRP\_FLAG and ACCOUNT\_SUPER\_TYPE will be 'Y' and 'IND' respectively, else, will be populated as ADDRESS\_LINE\_1, CITY, STATE and ZIP from SEM\_CUSTOMER\_ADDRESS based on TEAM\_DIM\_ID and CUST\_DIM\_ID. CUST\_DIM\_ID will be derived as per below logic:
    - If the CUST\_DIM\_ID will not be in CUSTOMER AFFILIATION or ACCOUNT\_SUPER\_TYPE from CUSTOMER MASTER will be 'HCO' then from SEM\_DEMAND\_SALES\_COMPONENT.
    - Else, PARENT\_CUST\_DIM\_ID from CUSTOMER AFFILIATION based on CUST\_DIM\_ID and TEAM\_DIM\_ID.
  - **GRANDPARENT\_ALK\_ID** will be populated as per below logic:
    - 'Restricted Prescriber' if PDRP\_FLAG will be 'Y' and ACCOUNT\_SUPER\_TYPE as 'IND', which will be fetched from CUSTOMER MASTER based on CUST\_DIM\_ID.
    - It will be populated as ALK\_ID from SEM\_DEMAND\_SALES\_COMPONENT if the CUST\_DIM\_ID will not be in CUSTOMER AFFILIATION.
    - Else, it will be populated as PARENT\_ALK\_ID from CUSTOMER AFFILIATION based on Customer Dimension Id.
  - **GRANDPARENT\_CUSTOMER\_NAME** will be populated from Customer Master based on Customer Dimension Id along with below condition:
    - If Party Name will be like '%ENCUMBERED%' then concatenation of PARTY\_NAME and ZIP.

	<ul style="list-style-type: none"> <li>○ If PDRP FLAG and ACCOUNT_SUPER_TYPE will be 'Y' and 'IND' respectively, then 'Restricted Prescriber'.</li> <li>○ If ACCOUNT_SUPER_TYPE will be 'HCO' then PARTY_NAME</li> <li>○ If MIDDLE_NAME will not be blank then concatenation of FIRST_NAME, MIDDLE_NAME and LAST_NAME.</li> <li>○ Else, it will be populated as concatenation of FIRST_NAME and LAST_NAME.</li> </ul> <p>CUST_DIM_ID will be derived as per below logic:</p> <ul style="list-style-type: none"> <li>○ If the CUST_DIM_ID will not be in CUSTOMER AFFILIATION then it will be fetched from SEM_DEMAND_SALES_COMPONENT.</li> <li>○ Else, PARENT_CUST_DIM_ID from CUSTOMER AFFILIATION based on CUST_DIM_ID and TEAM_DIM_ID.</li> </ul> <ul style="list-style-type: none"> <li>● <b>GRANDPARENT_ACCOUNT_TYPE</b> will be NULL if PDRP_FLAG and ACCOUNT_SUPER_TYPE will be 'Y' and 'IND' respectively, else, will be populated as ACCOUNT_TYPE from CUSTOMER MASTER based on CUST_DIM_ID.</li> <li>● <b>ACCESSIBILITY_GROUP</b> will be populated from SEM_CUSTOMER_ACCESSIBILITY_GROUP table based on ALK_ID for team Psychiatry (Team Dim Id - 1). <ul style="list-style-type: none"> <li>○ <b>ACCESSIBILITY_GROUP</b> has below values <ol style="list-style-type: none"> <li>1. #### 4.12.10 PATIENT HUB

##### 4.12.10.1 HUB ENROLLMENT

BRD-REQ-EXN-1	<p><b>Source:</b> Patient HUB</p> <p><b>Source Objects-Load Strategy/ Frequency:</b> SEM HUB Enrolment sourced from the below objects in patient hub which are synced to CDE3.0 system.</p> <p><b>Full Replication</b> (Daily → Mon-Fri)</p> <ol style="list-style-type: none"> <li>HUB_PROGRAM_MEMBER_MVN__C – Program Member</li> <li>HUB_ENROLLMENT_ALK__C- Enrollment_ALK__c <ul style="list-style-type: none"> <li>Data filtered by Program_ALK__C field for Product <b>Vivitrol</b> only.</li> </ul> </li> <li>HUB_REFERRAL_MVN__C- Referral</li> <li>HUB_STATUS_ALK__C- Status</li> <li>HUB_SHIPMENT_ALK__C- Shipment</li> <li>HUB_ALL_ENROLLMENT_ALK__C- Enrollment</li> </ol> <p><b>Incremental Replication</b> (Daily → Mon-Fri)</p> <ol style="list-style-type: none"> <li>HUB_ENROLLMENT- Enrollment_ALK__c</li> <li>HUB_ENROLLMENT_REFERRAL--Referral_MVN__c</li> </ol> <p><b>Subject Area:</b> Patient Enrollments/Referrals</p> <p><b>Markets:</b> Psychiatry, Addiction</p> <p><b>Products:</b> Aristada, Lybalvi ,Vivitrol</p> <p><b>MDM Mastering:</b> NO</p>
BRD-REQ-SEM-2	<p><b>SEM_HUB_ENROLLEMENT</b> captures data from (Program Member, Enrollment_ALK__c, Referral, Status, Shipment and Enrolment, Enrollment_ALK__c, Referral_MVN__c) from Service Cloud for Patient access at</p>

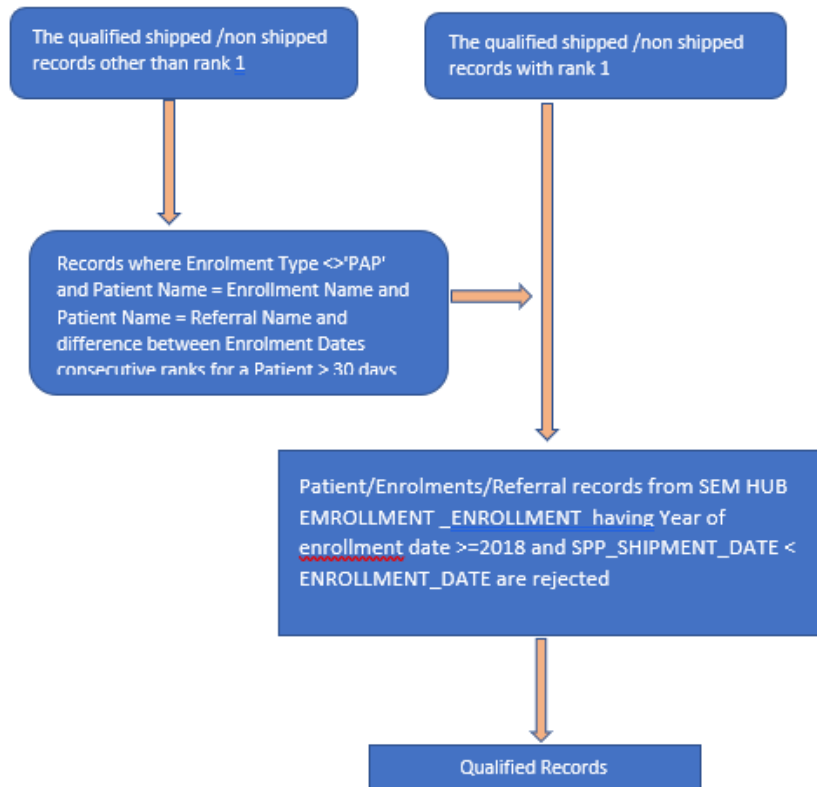

the Enrollment Granularity. Here unique key is ENROLLMENT\_ID+REFERRAL\_ID. It contains current and historic enrollments from Exchange. Enrollments are available from 2018-08-01 till date.

**Logic for Identification of Shipped and Non-Shipped Patients from HUB\_PROGRAM\_MEMBER\_MVN\_\_C, HUB\_ENROLLMENT\_ALK\_\_C, HUB\_REFERRAL\_MVN\_\_C**

- Fetch patients, enrollments and referrals from source Program Member (HUB\_PROGRAM\_MEMBER\_MVN\_\_C) , Enrollment\_ALK\_\_c (HUB\_ENROLLMENT\_ALK\_\_C ), Referral (HUB\_REFERRAL\_MVN\_\_C) for shipped (triage date and ship date is not null) and non-shipped records where CREATEDDATE greater than '2017-08-01' are qualified for SEM\_HUB\_ENROLLMENT.
- Shipped/Non-Shipped Patients are ranked based on enrollment date, ship date, triage date, createdate and records with earliest date from following date combinations- Referral Latest Shipment Date, Status Last Shipment Date, Status Record Date, Status Created Date, Shipment Create Date, Shipment Shipped Date.

**Business logic based on Rank:**

- Consider Patient records with Rank=1 and any records where Enrolment Type <>'PAP' and Patient Name = Enrollment Name and Patient Name = Referral Name and difference between Enrolment Dates consecutive ranks for a Patient > 30 days.

**Field with Business Logic involved:**

**1. Logic for REROUTES:**

REROUTES is set to 'Y' if There are multiple 'sppdisplayname' against a particular enrolment in Pharmacy Alignment XREF OR If enrolment name in Hub referral is not null and its reason in Hub Status is either 'PATIENT TRANSFERRED BACK TO HUB' or 'TRIAGED TO OTHER SP'

For all other scenarios except above, it is set to 'N'.

**2. Fill Status flag will be 'F' either if SHIP DATE is not null or [ SHIP DATE IS NULL AND SPP SHIPMENT DATE from HUB\_ENROLLMENT\_REFERRAL IS NULL and MIN\_SHIP\_DATE IS not NULL] else 'U'.**

*For reference:* Look Ship date and MIN\_SHIP\_DATE population logic **at point 5.**

**3. SPP SHIPMENT DATE will be populated as SPP SHIPMENT DATE from Referral\_MVN\_\_c when SHIP DATE is null and SPP SHIPMENT DATE is not null else SHIP DATE when SHIP DATE is not null. In case above two scenario is not applicable the MINIMUM SHIP DATE when both (SHIP DATE, SPP SHIPMENT DATE) are NULL and MINIMUM SHIP DATE is not null.**

*For reference:* Look Ship date and MIN\_SHIP\_DATE population logic **at point 5.**

**4. SECONDARY DIAGNOSIS will be set as 'Alcohol and Opioid Dependence' If [indication from HUB\_ENROLLMENT is ALCOHOL DEPENDENCE and secondary diagnostics contains '11.2'] or [Indication is OPIOID DEPENDENCE and secondary diagnostics contains '10.2']. All other scenarios Indication from HUB\_ENROLLMENT is populated.**

**5. SHIP DATE Population logic**

SHIP\_DATE will be populated based on combination of "Patient Name, Enrolment Name, Referral Name, Enrolment Date ALK, Referral Create Date, Triage Date, Dispensing Pharmacy Name", earliest date is chosen among Referral Latest Shipment Date, Status Last Shipment Date, Status Record Date, Status Created Date, Shipment Create Date, Shipment Shipped Date'

**MIN SHIP DATE Population Logic**

MIN\_SHIP\_DATE is populated based on combination of ENROLLMENT NAME and ENROLLMENT ID, earliest SPP\_SHIPMENT\_DATE is chosen from 'SEM\_HUB\_ENROLLMENT\_SPECIALTY\_PHARMACY' table.

**6. PRESCRIBING PROVIDER ALK ID will be populated as ALK\_ID from Customer Identifier If prescribing provider hub id exists, else PRESCRIBING\_PROVIDER\_ALK\_ID from HUB\_ENROLLMENT.**

**7. PRESCRIBING PROVIDER IS INJECTION PROVIDER will be 'Y' in case either prescribing provider hub id or Injection Provider Hub ID is available in Customer Identifier. Else 'N'**

**8. ENROLLMENT INJECTION PROVIDER ALK ID will be populated as ALKID from customer identifier for source id Injection Provider Hub ID else INJECTION\_PROVIDER\_ALK\_Id from HUB\_ENROLLMENT.**

**9. ENROLLMENT PRESCRIBER ALK ID will be populated as ALKID from customer identifier for source id Prescriber Hub ID else Prescriber ALK ID from HUB\_ENROLLMENT.**

**10. Fetch PRESCRIBER HUB ID from HUB\_ENROLLMENT if prescriber hub id in HUB\_ENROLLMENT\_REFERRAL is null else from HUB\_ENROLLMENT\_REFERRAL.**

**11. PRESCRIBER ALK ID will be populated as ALKID from customer identifier for source id- prescriber hub id from HUB\_ENROLLMENT or HUB\_ENROLLMENT\_REFERRAL in respective order else prescriber ALKID from HUB\_ENROLLMENT.**

**12. PRESCRIBER NAME and ADDRESS DETAILS** will be populated as below logic:

If prescriber hub id is null, Include PRESCRIBER NAME and ADDRESS details from HUB\_ENROLLMENT else from HUB\_ENROLLMENT\_REFERRAL.

**13. REFERRAL INJECTION PROVIDER HUB ID** will be populated from referral MVN if injection provider hub id is not null else from Enrollment Alk.

**14. REFERRAL INJECTION PROVIDER ALK ID** will be populated as  
ALKID from customer identifier for source id injection provider hub id from HUB\_ENROLLMENT or HUB\_ENROLLMENT\_REFERRAL in respective order else injection provider ALKID from HUB\_ENROLLMENT.

**15. INJECTION PROVIDER FACILITY NAME/ADDRESS DETAILS**

Populate INJECTION PROVIDER FACILITY NAME/ADDRESS DETAILS from HUB\_ENROLLMENT\_REFERRAL if injection provider hub id is not null else from HUB\_ENROLLMENT.

Below fields are directly Mapped from their respective source table:

4.12.10.2 HUB ENROLLMENT SPECIALTY PHARMACY

BRD-REQ-EXN-1	<p><b>Source:</b> Patient HUB</p> <p><b>Source Objects -Load Strategy/ Frequency:</b></p> <p>SEM HUB Enrolment Specialty sourced from the below feeds in patient hub which are synced to CDE3.0 system.:</p> <p><b>Full Replication (Daily → Mon-Fri)</b></p> <ol style="list-style-type: none"><li>1. HUB_PROGRAM_MEMBER_MVN__C – Program Member</li><li>2. HUB_ENROLLMENT_ALK__C- Enrollment_ALK__c<ul style="list-style-type: none"><li>• Data filtered by Program_ALK__C field for Product <b>Vivitrol</b> only.</li></ul></li><li>3. HUB_REFERRAL_MVN__C- Referral</li><li>4. HUB_STATUS_ALK__C- Status</li><li>5. HUB_SHIPMENT_ALK__C- Shipment</li><li>6. HUB_ALL_ENROLLMENT_ALK__C- Enrollment</li></ol>
---------------	--

**Incremental Replication (Daily → Mon-Fri)**

7. HUB\_ENROLLMENT-Enrollment\_ALK\_\_c
8. HUB\_ENROLLMENT\_REFERRAL--Referral\_MVN\_\_c

**Subject Area:** Patient Enrollments/ Referrals

**Markets:** Psychiatry, Addiction

**Products:** Aristada, Lybalvi , Vivitrol

**MDM Mastering:** NO

BRD-  
REQ-  
SEM  
-2

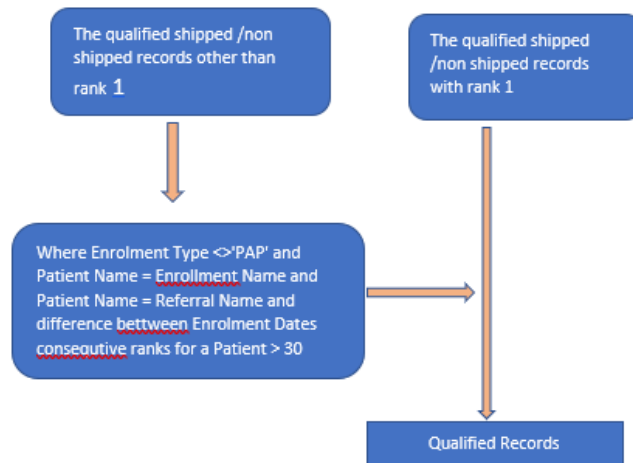

**SEM\_HUB\_ENROLLEMENT\_SPECIALTY\_PHAMRACY captures data from** (Program Member, Enrollment\_ALK\_\_c, Referral, Status, Shipment and Enrolment, Enrollment\_ALK\_\_c, Referral\_MVN\_\_c) and SEM\_HUB\_ENROLLMENT from Service Cloud for Patient access at the Referral Granularity. Here unique key is ENROLLMENT\_ID+REFERRAL\_ID. It contains current and historic referrals from Exchange. Referrals are available from '2017-02-01' till date.

**Logic for Identification of Shipped and Non-Shipped Patients from HUB\_PROGRAM\_MEMBER\_MVN\_\_C, HUB\_ENROLLMENT\_ALK\_\_C, HUB\_REFERRAL\_MVN\_\_C**

- ALL patients, enrollments and referrals from source Program Member (HUB\_PROGRAM\_MEMBER\_MVN\_\_C), Enrollment\_ALK\_\_c (HUB\_ENROLLMENT\_ALK\_\_C), Referral (HUB\_REFERRAL\_MVN\_\_C) for shipped (triage date and ship date is not null) and non-shipped records where CREATEDDATE greater than '2017-08-01' are qualified for SEM\_HUB\_ENROLLMENT.
- Shipped/Non-Shipped Patients are ranked based on enrollment date, ship date, triage date, createdate and patient records with earliest date from following date combinations- Referral Latest Shipment Date, Status Last Shipment Date, Status Record Date, Status Created Date, Shipment Create Date, Shipment Shipped Date.

**Business logic on basis of Rank:**

The qualified shipped /non shipped records are with rank 1 and records other than rank 1 where Enrolment Type <>'PAP' and Patient Name = Enrollment Name and Patient Name = Referral Name and difference between Enrolment Dates consecutive ranks for a Patient > 30 days.

**Fields with business logic:**

- 1. REROUTES** will be set to 'Y' if there are multiple 'sppdisplayname' for one enrolment in Pharmacy Alignment XREF OR If enrolment name in Hub referral is not null and its reason in Hub Status is either 'PATIENT TRANSFERRED BACK TO HUB' or 'TRIAGED TO OTHER SP'  
For all other scenarios except above, it is set to 'N'.

- 2. Fill Status** flag will be 'U' if SHIP DATE is null else 'F'.

Refer 3<sup>rd</sup> point for SHIP\_DATE for reference.

- 3. SPP\_SHIPMENT\_DATE /SHIP\_DATE:**

Fetch SPP SHIPMENT DATE as earliest date among (Referral Latest Shipment Date, Status Last Shipment Date, Status Record Date, Status Created Date, Shipment Create Date, Shipment Shipped Date)

- 4. SECONDARY DIAGNOSIS** will be

set as 'Alcohol and Opioid Dependence' If [indication from HUB\_ENROLLMENT is ALCOHOL DEPENDENCE and secondary diagnostics contains '11.2'] or [Indication is OPIOID DEPENDENCE and secondary diagnostics contains '10.2']. All other scenarios Indication from HUB\_ENROLLMENT is populated.

- 5. PRESCRIBING PROVIDER ALK ID** will be populated as ALK\_ID from Customer Identifier If prescribing provider hub id exists, else PRESCRIBING\_PROVIDER\_ALK\_ID from HUB\_ENROLLMENT.

- 6. PRESCRIBING PROVIDER IS INJECTION PROVIDER** will be 'Y' in case either prescribing provider hub id or Injection Provider Hub ID is available in Customer Identifier. Else 'N'.

- 7. ENROLLMENT INJECTION PROVIDER ALK ID** will be populated as ALKID from customer identifier for source id Injection Provider Hub ID else INJECTION\_PROVIDER\_ALK\_Id from HUB\_ENROLLMENT.

- 8. ENROLLMENT PRESCRIBER ALK ID** will be populated as ALKID from customer identifier for source id Prescriber Hub ID else Prescriber ALK ID from HUB\_ENROLLMENT.

- 9. PRESCRIBER HUB ID** will be populated from HUB\_ENROLLMENT if prescriber hub id in HUB\_ENROLLMENT\_REFERRAL is null else from HUB\_ENROLLMENT\_REFERRAL.

- 10. PRESCRIBER ALK ID** will be populated as ALKID from customer identifier for source id- prescriber hub id from HUB\_ENROLLMENT or HUB\_ENROLLMENT\_REFERRAL in respective order else prescriber ALKID from HUB\_ENROLLMENT.

- 11. PRESCRIBER NAME and ADDRESS DETAILS** Will be populated as per below logic:  
If prescriber hub id is null, Include PRESCRIBER NAME and ADDRESS details from HUB\_ENROLLMENT else from HUB\_ENROLLMENT\_REFERRAL.

- 12. REFERRAL INJECTION PROVIDER HUB ID** will be populated from referral MVN if injection provider hub id is not null else from Enrollment Alk.

- 13. REFERRAL INJECTION PROVIDER ALK ID** will be populated as ALKID from customer identifier for source id injection provider hub id from HUB\_ENROLLMENT or HUB\_ENROLLMENT\_REFERRAL in respective order else injection provider ALKID from HUB\_ENROLLMENT.

- 14. INJECTION PROVIDER FACILITY NAME/ADDRESS DETAILS** will be populated as  
from HUB\_ENROLLMENT\_REFERRAL If injection provider hub id is not null else from HUB\_ENROLLMENT.

### 4.18.7 INBOUND AUDIT

BRD-REQ-SEM-3

This is an audit table to track when data in the Semantic Schema is refreshed for Pushed Suggestion, Suggestion Feedback, Action, and Like/Dislikes.

- **FILE\_ID** will be used to trace records in the Semantic tables week over week.
- **REFRESH\_DATE** will be updated with the date when data is refreshed. The system will check if the refresh is greater than or equal to the current date and then it will be processed.
- **SOURCE\_NAME** will contain view name for which audit entry will be recorded.

**Sample Data for reference:**

File_ID	SOURCE_NAME	VENDOR_ACCOUNT_NAME	DATABASE_SCHEMA_NAME	RECORD_COUNT	REFRESH_DATE
2023022201	VW_DOE_ALL_SUGGESTIONS	RWB60621	CDE_EXN	1000	2/22/2023
2023022202	VW_DOE_PUSHED_SUGGESTIONS	RWB60621	CDE_EXN	500	2/22/2023
2023022203	VW_DOE_SUGGESTION_FEEDBACK	RWB60621	CDE_EXN	100	2/22/2023

2023022204	VW_DOE_ACTION_TAKEN	RWB60621	CDE_EXN	200	2/22/2023
2023022205	VW_DOE_LIKE_DISLIKE	RWB60621	CDE_EXN	200	2/22/2023

• Below fields are directly populated from source:

BRD-REQ-DW- 3	<p><b>Monthly Process:</b></p> <ul style="list-style-type: none"> <li>One-time historical data processing will be done for all Capgemini &amp; small pharmacies to include all the Inventory data before June'23</li> <li><b>NDC code</b> can be fetched by removing '-' from source data wherever its applicable</li> <li>Filter out all the historical records with NDC "65757050003" for <b>Cigna</b> pharmacy.</li> <li>NDC code will be defaulted to "65757050003" for <b>Medicine Shoppe</b> Pharmacy.</li> <li>Magellan Pharmacy will have historical data of Aristada brand along with Vivitrol.</li> <li>NDC code "6575730001" needs to be replaced by "65757030001" code for <b>ORSINI</b> pharmacy.</li> <li>NDC code will be replaced to "6575730001" wherever in historical data its other than Vivitrol NDC for <b>Restore-Rx</b> Pharmacy.</li> <li><b>DATA_SOURCE_PROVIDER</b> value needs to be defaulted to 'CAPGEMINI' for Capgemini files, whereas it need to populate as Parent Pharmacy name from XREF for small pharmacies.</li> </ul> <p><b>Daily Process:</b></p> <ul style="list-style-type: none"> <li>One-time historical data processing will be done to include all the Inventory data before June'23</li> <li>Restatement logic will be applied on history data based on LH_NVENTORY_KEY.</li> <li>Inventory record with maximum date in each file for CIGNA pharmacy historical data will be considered.</li> <li>For the remaining pharmacies, all inventory records will be considered.</li> </ul>
BRD-REQ-DW-4	<p><b>Monthly Process:</b></p> <ul style="list-style-type: none"> <li> <b>Capgemini Inventory data:</b> <ul style="list-style-type: none"> <li><b>Customer details</b> for active HCO's will be fetched from customer dimension based on NPI received from source.</li> <li><b>Pharmacy Name &amp; Parent Pharmacy Name</b> will be populated from XREF_LQHUB_PHMCY_MAPPING for all Pharmacies based on File name ingested (between first and second Underscore).</li> <li><b>Product details</b> will be fetched from Product dimension based on NDC from source data'.</li> <li><b>DATA_SOURCE_PROVIDER</b> will be hardcoded as 'CAPGEMINI'.</li> </ul> </li> </ul>

- **WEEKLY\_MONTHLY\_FLAG** will be populated from XREF\_LQHUB\_PHMCY\_MAPPING based on INSERT\_SRC\_FILENAME (between 2nd last and last underscore). This will signify whether the inventory details are from weekly or monthly feed.
- **DIRECT\_INDIRECT\_FLAG** will be populated from XREF\_LQHUB\_PHMCY\_MAPPING for all Pharmacies.
- **Adjusted Date** will be calculated based on the logic below.
  - If INVENTORY\_DATE >= '25' Then Last Day of Month.
  - If INVENTORY\_DATE <= '20' Then Last Day of Previous month.
  - Should be Populated Inventory data if between 21-24
- **Small Pharmacies Inventory data:**
  - **Pharmacy Name & Parent Pharmacy Name** will be populated from XREF\_LQHUB\_SMALL\_PHARMACY\_MAPPING for all pharmacies based on File Name Ingested.
  - **Pharmacy Location Name, State and ZIP** will be directly populated from source.
  - **Product details** will be fetched from Product dimension based on NDC from source data'.
  - **Source File name** will be populated as Ingested File Name from DATA FILE META

**Daily Process:**

- **Customer details** for active HCO's will be fetched from customer dimension based on NPI received from LiquidHub.
- **Pharmacy Name** will be populated from XREF\_LQHUB\_PHMCY\_MAPPING for all Pharmacies except Asembia based on INSERT\_SRC\_FILENAME (between first and second Underscore). For Asembia, Pharmacy Name will be populated from XREF\_ASEMBIA\_NPI\_MAPPING based on NPI.
- **Parent Pharmacy Name** will be same as Pharmacy Name for all pharmacies except Asembia. For Asembia, Parent Pharmacy Name will be hardcoded as 'Asembia'.
- **Product details** will be fetched from Product dimension based on NDC from LiquidHub.
- **DATA\_SOURCE\_PROVIDER** will be hardcoded as 'LiquidHub'.
- **WEEKLY\_MONTHLY\_FLAG** will be populated from XREF\_LQHUB\_PHMCY\_MAPPING based on INSERT\_SRC\_FILENAME (between 2nd last and last underscore). This will signify whether the inventory details are from weekly or monthly feed.
- **DIRECT\_INDIRECT\_FLAG** will be populated from XREF\_LQHUB\_PHMCY\_MAPPING for all Pharmacies except Asembia. For Asembia, DIRECT\_INDIRECT\_FLAG will be populated from XREF\_ASEMBIA\_NPI\_MAPPING based on NPI.
- **Adjusted Date** will be calculated based on the logic below.

Pharmacy name	Adjusted date logic
CIGNA	If Inventory date lies between Tuesday and Monday, then the Sunday in between will be populated as Adjusted date.
Asembia	If the Inventory date lied between 25 <sup>th</sup> – 20 <sup>th</sup> of a month, then the Adjusted date should be the month end falling in between these dates.
Other Pharmacies	If Inventory date lies between Tuesday and Monday, then the Sunday in between will be populated as Adjusted date.

	<ul style="list-style-type: none"> <li>● <b>PHARMACY_LOCATION, CALCULATED_UNITS_SHIPPED, SPP_ITEM_NO</b> will be hardcoded as NULL for daily/weekly Inventory feeds.</li> </ul>

QUANTITY_DISPENSED	QUANTITY_DISPENSED
QUANTITY_RECEIVED	QUANTITY_RECEIVED
QUANTITY_ADJUSTED	QUANTITY_ADJUSTED

#### Medicine Shoppe

Semantic table field	Source field
INVENTORY_DATE	INVENTORY_DATE
PHARMACY_LOCATION	PHARMACY_LOCATION
Opening Inventory	BEGINNING_BALANCE_QUANTITY
Units purchased	QUANTITY_RECEIVED
Closing Inventory	ENDING_INVENTORY_QUANTITY
Adjustments and Transfers	QUANTITY_ADJUSTED
Calculated units Shipped	CALCULATED_UNITS_SHIPPED
Reported Units Shipped	QUANTITY_DISPENSED

#### Daily Process:

- The semantic table will be a daily refresh and will hold the latest available Inventory data from LiquidHub along with complete historical data.
- **Customer ID and Address details** will be populated from Customer Master based on Customer Dimension ID.
  - If multiple Active Customer IDs are present in the Customer Master against the same NPI, then lowest ALK\_ID will be populated. This will be notified to Alkermes Business team (Alexander Czaprynski, James Porter, Phylis Fu) for review. Alkermes Business team will get this fixed in the consecutive runs.
  - If no active account to NPI mappings is present, then the NPI must be mapped using an Inactive account to NPI mapping.
  - If multiple inactive account to NPI mappings exist, the account with the minimum ALK\_ID will be selected.
- Pharmacy **State, City, ZIP** will be populated from SEM Customer Address based on CUST DIM ID
